## AEM 380 lph EFI Fuel Pump

Casselberry, Florida, 01/22/2016 - Motorcycle Performance Specialties is pleased to announce the immediate availability of the AEM 380 lph high flow, high pressure fuel pump. This pump maintains very high flow even at boosted fuel pressures; 340 lph @ 73 PSI (30 psi boost) with a boost referenced 1:1 fuel pressure regulator. The AEM pump has a low current draw of only 10 amps at 43 psi. A male -6 to -8 AN outlet fitting with integral high pressure check valve, terminal nuts, terminal boots and installation instructions are included. However, most motorcycle applications will use a -6 AN inlet and outlet so we have put together a fitting kit for -6AN lines on both inlet and outlets.

The AEM 380 lph fuel pump, P/N 89-50-1005, is racer priced at just \$159.00. The -6 fitting kit for the AEM pump, P/N 1-0741 is racer priced at \$24.00. Both are in stock for immediate shipment.
