## **MPS Autoshift With Fuel Kill**

Sanford, Florida, 12/28/2009 – Motorcycle Performance Specialties is excited to announce the immediate availability of our new Autoshift With Fuel Kill. The MPS Autoshift With Fuel Kill activates your shifter and interrupts the fuel supply to your engine at a set rpm to allow full throttle air shifts without backfires or the FI light coming on. The MPS Autoshift With Fuel Kill is a universal product that can easily be installed on most EFI bikes. The MPS Autoshift With Fuel Kill is ideal for use when using a big dry nitrous kit. The kill time is adjustable from 50ms -100ms via the access port on the top of the box. The shift point is adjustable via MSD rpm modules available separately.
