**Shim in Tappet with Triple Groove Keepers**

### **KPM Hayabusa "Shim In Tappet" Spring Kit**

Casselberry, Florida, 08/08/2012 - Motorcycle Performance Specialties is excited to announce the immediate availability of KPM Hayabusa "Shim In Tappet" Spring Kit part number 71-60-60750. This high quality kit solves the shim spitting problem on performance Hayabusa motorcycles. This unique design prevents retainer "ovaling" because the shim rides in the heat treated steel tappet and not the aluminum or titanium retainer. The Kit comes complete with new steel spring seats, "shim in tappet" tappets, 65lb valve springs, and special titanium retainers. The kit is also available with the new triple groove valve keepers as part number 71-60-60780. K P M triple groove valves are required for P/N 71-60-60780.

Phone: 321.972.8282 – Fax: 321.972.5123  
380 Orange Lane – Casselberry, Florida 32707
