MPS Named Master U.S. Distributor For MPE Data Acquisition Systems

Sanford, Florida, 06/23/2004 – Motorcycle Performance Specialties is excited to announce the immediate availability of the MPE line of data acquisition systems. We are stocking the full line of data recorders as well as all accessories. The Generation 3 Data Acquisition System brings you current expandable data-acquisition technology at a reasonable price. The Generation 3 Data Acquisition System is fast, with sample rate of 100 times per second. Windows software is standard with the MPE Data Acquisition System. The MPE Data Acquisition System can easily monitor these functions: Battery Voltage, Engine RPM, Shift

points, WOT (wide open throttle), Two-step RPM, Shift light operation (check your reaction to the shift light in each gear), Wheel spin, Clutch Slip, EGT's (exhaust gas temperature), and up to 5 Analog ports. Analog ports can be used to monitor various pressures including fuel pressure, turbo/blower boost, nitrous pressure, air box pressure, oil pressure etc. The Windows software also comes standard with a pit-run feature, which allows you to run the bike in the pits with the P.C. monitoring the bike functions in real time. This is the ideal way to check all systems on the bike.
