MPS Spyder Nitrous Spray System

Sanford, Florida, 6/5/2008 – Motorcycle Performance Specialties is proud to announce the availability of our new Spyder Nitrous Spray System. The Spyder Nitrous Spray System uses 4 individual NOS flare jets for exact distribution of nitrous to each cylinder. This eliminates problems with uneven

distribution associated with larger nitrous shots in dry nitrous systems. Spyder Nitrous comes with whatever jets you specify. The nitrous enters the air box through a –4 bulkhead fitting on the bottom rear of the air box. The bulkhead fitting inside the air box is connected to the distribution block via a –4 line. From the distribution block the nitrous passes through the 4 individual jets and through the stainless steel tubes into the appropriate port. The Spyder Nitrous System is capable of producing 200 horsepower when used with the proper components. The Spyder Nitrous Spray System was specifically designed for 99-07 Suzuki Hayabusa, but can be easily adapted to most other fuel injected sport bikes. It can be used with or without an air filter as well. The Spyder Nitrous Spray System P/N 1-0477, is racer priced at \$229.00, and is in stock now for immediate shipment.
