## ***MPS Hayabusa Trap Door Oil Pans***

Casselberry, Florida, 01/6/2014 – Motorcycle Performance Specialties is excited to announce the immediate availability of our new Hayabusa Trap Door Oil Pans. The trap door design allows oil to flow freely to the back of the pan during acceleration. During deceleration the door closes and traps the oil in the back of the pan. This keeps the fixed pick up submerged in oil both accelerating and decelerating. The oil that bypasses the pressure relief valve has been ported to the back of the pan as well. This will prevent just pumping oil from the back of your engine to the front. These CNC machined, billet aluminum pans are available in 1" and 2" deep versions. They both feature a fixed oil pump pickup with screen. The MPS Hayabusa Trap Door Oil Pan Low Profile Oil Pans, P/N 1-0632 and P/N 1-0633 are priced at \$399.00. Both are in stock now for immediate shipment.
