New Dedenbear Lightning Crossover Delay Box Throttle Stop Controller Now Available

Sanford, Florida, 07/9/2004 – Motorcycle Performance Specialties is excited to announce the immediate availability of the Dedenbear Lightning Crossover Delay Box & Throttle Stop controller part number 11-L1. The lightning's handsome billet aluminum case is only 2" thick. Its face size is only 6" x 3" making it the smallest multi feature box available. It features 4 different delay modes: Cross Talk, Crossover, Delay, and Interface. It also includes two 4 stage timers, each adjustable to the thousandth of a second (.001). Ideal for throttle stops, shift by time, nitrous, lean outs and retards. The Lightning's many other features include: SKIP UP AND SKIP DOWN - (same as tap up/down) You can add or subtract from your delay with a push of a separate button after you release your transbrake button. Programmable to the thousandth of a second (.001) with recall

Innovative Racing Electronics

built-in to see how many times you skipped. STARTING LINE CONTROL OUTPUT WITH ADJUSTABLE TIME RELEASE - Allows you to roll your throttle open at transbrake button application and your throttle stop holds the motor at your staging RPM. You can adjust the time when the motor pulls to wide open before the transbrake releases. "SUPER START" AUTOMATIC STARTING LINE CONTROL FOR ACTIVATING A THROTTLE STOP PRIOR TO STAGING - Allows you to roll your throttle open at transbrake button application and your throttle stop holds the motor at your staging RPM. You can adjust the time when the motor pulls to wide open before the transbrake releases. PRO/FULL FEATURE - Allows you to save two groups of settings.

ADJUSTABLE TRANSBRAKE LOCKOUT - Prevents the transbrake from being reapplied down track. It adjusts in 1-second increments. SCROLL KEYS UP AND DOWN - Makes adjustments quick and easy. REMOTE DISPLAY DIAL-IN BOARD OUTPUT RD-1 (Patent 6,411,205 B1) HOW LATE TIMER - When taking multiple hits this will tell you which hit you launched on and by how much. COMBINE STARTING LINE AND THROTTLE STOP CONTROL - Single throttle stop can be used for both functions. CROSS-OVER COMPENSATION (Patent #5,652,468) takes extra time out when you crossover to compensate for not seeing the bulb as well. The New Dedenbear Lightning is in stock and available for immediate shipment.
